BUILDING, CONSTRUCTION AND INDUSTRY

KINEMATICS 4K

Latest generation kinematics, completely redesigned to guarantee maximum breakout force.

BREATHTAKING VIEW

The new ROPS/FOPS Level II certified cabin guarantees 360° visibility, allowing total visual control over any equipment installed.

SAFETY IS OUR PRIORITY

The front axle internally integrates the negative/automatic parking brake for maximum safety in every operating situation.

STAY COOL

The new ventilation system guarantees maximum comfort to the operator. You can choose between automatic climate control or air conditioning, thus obtaining the perfect temperature in the cabin.

CLEAN AIR AT ALL TIMES

Engine air filtration takes place via the main cartridge, safety cartridge and cyclone pre-filtration.

100% VENIERI DESIGN

Maximum attention by the Venieri Style Center in preserving a “family feeling”, despite the introduction of a Stage V engine with substantially larger dimensions than the previous Stage IIIB.

SILENT OPERATION

The commitment of Venieri’s R&D in terms of noise reduction has resulted in a decrease of noise pollution below 70 dB; this value was certified on previous models and guarantees the operator maximum operating comfort.

VENIERI DASH CONTROL

With the color electronic dash control the operator will be able to easily manage the electronic transmission, the available options and the reading of the transmission pressure.

STAGE 5

DEUTZ STAGE V /TIER 4f ENGINE

New Deutz engine, compliant with the latest anti-pollution regulations with high torque already at low rpm. Substantial increase in power up to 21% and torque up to 17%, compared to previous models.

TOTAL STABILITY

All new Venieri loaders are equipped with an oscillating rear axle supported by maintenance-free supports.

"SHIFT ON FLY" MECHANICAL GEARBOX

2-speed mechanical gearbox, with variation of the mechanical speed ratio and electronic shifting management (On VF 9.63D. On VF 7.63D the gear change is synchronized from standstill).

AGILE BY VOCATION AND DESIGN

The particular design of the counterweight has been studied to obtain extremely high angles of operation, protect the LED street lights, ensure maximum maneuverability in tight spaces and prevent the ground from sticking when operating off-road.

DOUBLE SPEED

DOUBLE ATTENTION FOR SAVINGS

Electrically controlled and hydraulically operated double speed cooling fan.
Rotation speed according to working conditions: reduced fuel consumption and low noise.

Venieri GLOBAL

VENIERI GLOBAL

Being connected is no longer optional for us. Thanks to the (standard) integrated Venieri Global system, the new Venieri loaders and your Smartphone become one.
(Venieri Global annual subscription not included).

SMART FORWARD MOTION

Specific driving mode for the use of equipment that requires maximum oil flow combined with the possibility of low-speed transfers.
Manageable transfer either by using the Venieri Dash Control or directly from the pedal, allowing the operator full control of vehicle and equipment, without ever taking his hands off the steering wheel.

8.63C
10.63D

BORN FOR AGRICULTURAL USE

PARALLEL KINEMATICS

Latest generation kinematics, which guarantees parallel operation with the forks along the entire arm movement range.

SAFETY IS OUR PRIORITY

The front axle internally integrates the negative/automatic parking brake for maximum safety in every operating situation.

CLEAN AIR AT ALL TIMES

Engine air filtration takes place via the main cartridge, safety cartridge and cyclone pre-filtration.

SILENT OPERATION

The commitment of Venieri's R&D in terms of noise reduction has resulted in a decrease of noise pollution below 70 dB; this value was certified on previous models and guarantees the operator maximum operating comfort.

BREATHTAKING VIEW

The new ROPS/FOPS Level II certified cabin guarantees 360° visibility, allowing total visual control even if equipped with an extended parallel arm.

STAY COOL

The new ventilation system guarantees maximum comfort to the operator. You can choose between automatic climate control or air conditioning, thus obtaining the perfect temperature in the cabin.

100% VENIERI DESIGN

Maximum attention by the Venieri Style Center in preserving a "family feeling", despite the introduction of a Stage V engine with substantially larger dimensions than the previous Stage IIIB.

VENIERI DASH CONTROL

With the color electronic dash control, the operator will be able to easily manage the electronic transmission and the available options, and read the transmission pressure.

DEUTZ STAGE V|TIER 4f ENGINE

New Deutz engine, compliant with the latest anti-pollution regulations with high torque already at low rpm. Substantial increase in power up to 21% and torque up to 17%, compared to previous models.

"SHIFT ON FLY" MECHANICAL GEARBOX

2-speed mechanical gearbox, with variation of the mechanical speed ratio and electronic shifting management (On VF 10.63D. On VF 8.63C the gear change is synchronized from standstill).

TOTAL STABILITY

All new Venieri loaders are equipped with an oscillating rear axle supported by maintenance-free supports.

DOUBLE ATTENTION FOR SAVINGS

Electrically controlled and hydraulically operated double speed cooling fan. Rotation speed according to working conditions: reduced fuel consumption and low noise. Reversible fan kit available (optional).

TIRES FOR EVERY APPLICATION

Wide range of versatile agricultural tires of different sizes, depending on the type of terrain and use.

VENIERI GLOBAL

Being connected is no longer optional for us. Thanks to the (standard) integrated Venieri Global system, the new Venieri loaders and your Smartphone become one.
(Venieri Global annual subscription not included).

AGILE BY VOCATION AND DESIGN

The particular design of the counterweight has been studied to obtain extremely high angles of operation, protect the LED road lights, ensure maximum maneuverability in tight spaces and prevent the ground from sticking when operating off-road.

SMART FORWARD MOTION

Specific driving mode for the use of equipment that requires high oil flow combined with low-speed transfers. Manageable transfer via the Venieri Dash Control or directly from the pedal, allowing the operator full control of vehicle and equipment, without ever taking his hands off the steering wheel.

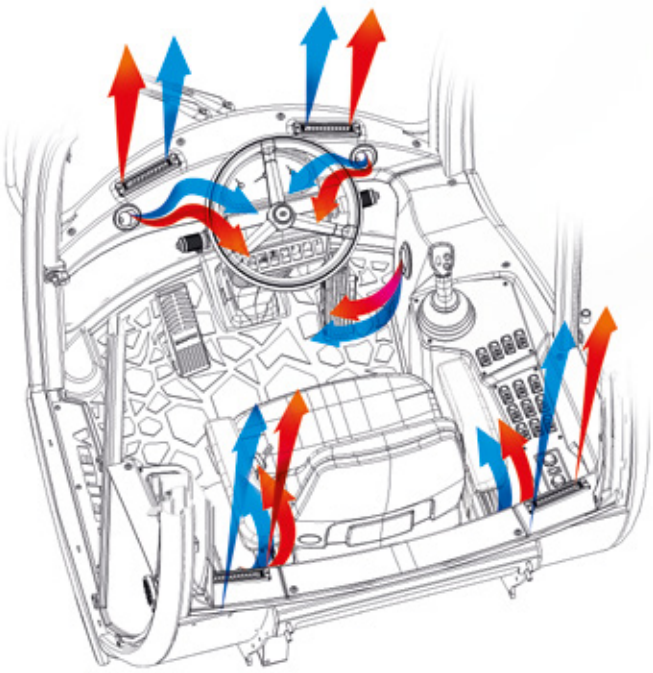
THE CABIN

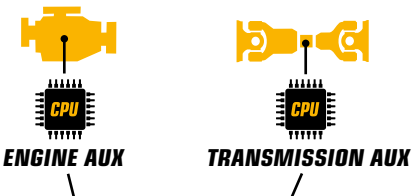
A BREATHTAKING VIEW.

Take a seat in your customized control room. Create your ideal work space by adjusting the pneumatic seat and the steering wheel to suit your specific needs. Select the commands, all at your fingertips. The excellent all-round visibility in which “blind spots” have been reduced to a minimum, offers the optimal view to work with maximum efficiency, allowing total visual and operational control over any installed equipment.

STAY COOL. AT ALL TIMES.

All the ventilation system (with 9 delivery points) has been completely redesigned for alignment to ISO10263 standards, and ensures easy maintenance of the heating and A/C unit, which can be completely tilted out of its housing.
Using a single dashboard, the operator can select the ideal temperature, thus achieving maximum working comfort.
All the Venieri wheel loaders can be equipped with Venieri Climatronic (optional): you set the temperature… and it will take care of the rest!





IT'S ALL HERE.

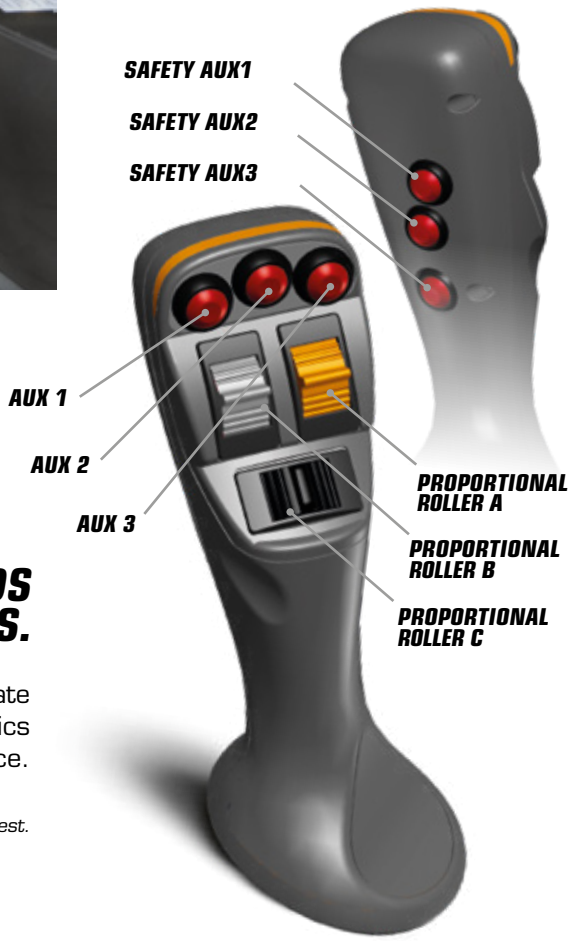
For the first time on a Venieri cabin, all the electronic components have been installed in a watertight box located in the cab frame, and accessible only from inside the passenger compartment; it is easy to access and complete with all the sockets required to perform diagnostics.

OPEN SESAME.

The double-opening door allows the operator to work with the access door closed, but with the upper glass open, thus ensuring maximum ventilation even when the A/C system is off and without protruding parts.

BEAUTY MEETS FUNCTIONALITY AT LAST.

In designing the cabin of the new wheel loaders, the Venieri Style Center tried to blend functionality and style, with the goal of manufacturing top-of-the-line machinery in terms of comfort and ergonomics. The new interior design has also made it possible to obtain various storage areas, which are very useful for storing small work tools, mobile phones, drinks and more.



POWER AND COMMANDS AT YOUR FINGERTIPS.

The mono-joystick* represents the ultimate in all-in-one technology: ergonomics and functionality at the operator's service.

** Optional, available on request.*

THE TRANSMISSION

HE A NEW VISION OF HYDROSTATIC EFFICIENCY

The increasingly stringent limits for exhaust emissions will continue to represent an ever-increasing challenge for the further technical development of mobile work machines. In addition, machine operators require increasingly greater efficiency and productivity.
The interconnection between electronic and hydraulic parts is essential in reducing fuel consumption and exhaust emissions, while also increasing the operating performance of the machine.
As a result, the extraordinary evolution of electronics applied to hydraulic power guarantees greater flexibility and a targeted response to address every different operational need more effectively.

SHIFT ON FLY. IT NEVER STOPS.

Mobile machines to support the speeds required in road travel are generally equipped with hydrostatic transmission and a gearbox that can be synchronized or automatic. In the first case (synchronized), the change from working gear to transfer is performed while stationary, while in the second case (SoF = automatic) the change takes place in motion.
The Dana-Rexroth transmission with electronically controlled hydrostatic pump and motor and a 367 SOF - Shift On Fly gearbox, also electronically operated, offers new opportunities for road driving, especially for wheel loaders.It allows the operator to operate at low speed with high traction forces, and later, during the transfer, change the mechanical ratio in torque, without stopping the machine, to reach a maximum speed of 40 km/h (self-limited).

- **GREATER EFFICIENCY: HIGH TRACTION FORCE AND MAXIMUM TRANSFER SPEED**
- **HIGH COMFORT: FAST AND SYNCHRONIZED GEAR CHANGES WITHOUT INTERRUPTIONS**
- **VERY HIGH RELIABILITY SERIES COMPONENTS**
- **MEETS FUNCTIONAL SAFETY REQUIREMENTS**
- **COMPACT DIMENSIONS, REDUCED INSTALLATION SPACE**

BENEFITS

Dana Rexroth
Transmission Systems

METHOD OF USE

3 different driving modes are available, each with different characteristics to always guarantee maximum operational efficiency.

- ECO
- WORK
- AUTOMOTIVE

CONTROL MODE

Essential for use with attachments, these modes allow adjusting the machine's forward motion (by power meter or pedal) with all the hydraulic power available for the attachment.

- POWER & SPEED
- CREEP
- CREEP MODE *PLUS*

ELECTRONIC DASHBOARD

Control the main functions of the machine with a finger. "DASH" digital panel necessary to select ALL the machine transmission modes and settings.

- INTUITIVE CONTROLS
- EASY TO USE
- REAL TIME DIAGNOSTIC

HIGH EFFICIENCY | HE

SAFETY ON BOARD

Several safety controls operated by the Rexroth control unit allow the user to operate in total safety, with maximum efficiency and without the risk of machine downtime.

AUTO CHECK SELF DIAGNOSIS

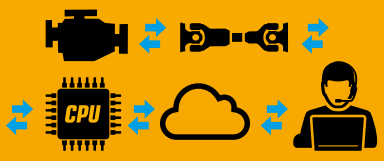
ELECTRONIC TRANSMISSION MANAGEMENT

It guarantees an optimized distribution of the available power to reduce consumption and increase performance.

AI ARTIFICIAL INTELLIGENCE

INTERCONNECTED MACHINE

A machine totally interconnected and controlled entirely in the Cloud. Welcome to the future.



- PREDICTIVE MAINTENANCE
- REAL-TIME DATA & DIAGNOSIS
- SELF-LEARNING
- MACHINE IN CLOUD

VENIERI 4.0 *(OPTIONAL)*

The VENIERI DASH CONTROL electronic Dashboard allows the operator to manage and view some of the most important functions of the machine with utmost ease and efficiency.

ECO MODE

ECO mode control screen, for a "softer" setting of the transmission response curve and limitation on engine RPM at max 1700 RPM

SMART FORWARD MOTION

Essential for use with attachments, these modes allow adjusting the machine's forward motion (by power meter or pedal) with all the hydraulic power available for the attachment.

AUTOMOTIVE

AUTOMOTIVE mode control screen, in which we have an average setting of the transmission response curve and all available engine revolutions

WORK

WORK mode control screen, in which we have the inhibition of the shifting, first gear from 15 km/h instead of 10 km/h and setting for the response curve of the more "aggressive" transmission

DIAGNOSTIC

Screen for checking diagnostic errors and pressures.

MANUAL ACCELERATOR

Engine RPM display and control screen for use with attachments

Venieri DASH CONTROL

The screens shown on this page are for VF 9.63D and VF 10.63D.

ECO
speed

Venieri

Venieri

ALL-SEASONS MACHINE.

The multifunction properties of the new loaders is achieved with the single multifunction connection plate, an essential implementation to make them a universal tool carrier.

SILENCE IS A VIRTUE.

The noise level of the new loader is simply extraordinary. With only 69dB of internal noise in the cabin, you will not even realize that you are working; you can also use very convenient options, such as the Bluetooth™ hands-free kit with maximum effectiveness.

VROOOOOOOOOM!

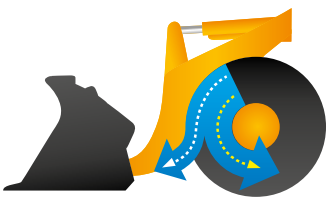
Driving speed 40 km/h*, self-limited. On the other hand, Venieri is based in the heart of the Italian Motor Valley and… the speed of our machines cannot be an option!

**20 km/h for the German version.*

POWER AND EFFICIENCY WHERE YOU NEED THEM MOST.

A lot of power for the hydraulic system and, at the same time, a reduction in travel speed.
For these reasons the new Venieri wheel loaders need a single pedal. The brake pedal with inching function can control both the mechanical and the hydraulic (inching) brake.
Obvious advantages are less wear on the service brake and optimal distribution of engine power.

NO PRESSURE
on the inching/brake pedal: maximum power for traction.



NORMAL PRESSURE
on the inching/brake pedal: speed reduction, more power in the service hydraulic system.

MAX PRESSURE
on the inching/brake pedal: the wheel loader stops, maximum strength to the hydraulic system

THE ENGINE

MAXIMUM POWER, ECO FRIENDLY ENGINE.

The new Venieri loaders are fitted with a DEUTZ TCD 3.6 L4 motor, which is a compact 4-cylinder in-line and water-cooled motor, for industrial and agricultural machinery, with a maximum power of 143 HP and aligned with EU Stage V and United States EPA Tier 4f requirements.
Externally cooled turbocharged engine with intercooler and exhaust gas recirculation. 100% of the power available on flywheel and front.
Up to two hydraulic drives can be installed on the PTO, with a total torque of up to 310 Nm.

- **MINIMUM CONSUMPTION OF OPERATING LIQUIDS VERSUS THE COMPETITION**
- **500 HOUR MAINTENANCE INTERVAL TO REGENERATE SULFUR DEPOSITS AND ADBLUE CRYSTALLIZATION**
- **TECHNICAL SUPPORT AND DIAGNOSIS PROVIDED BY DEUTZ'S WORLDWIDE SERVICE NETWORK**

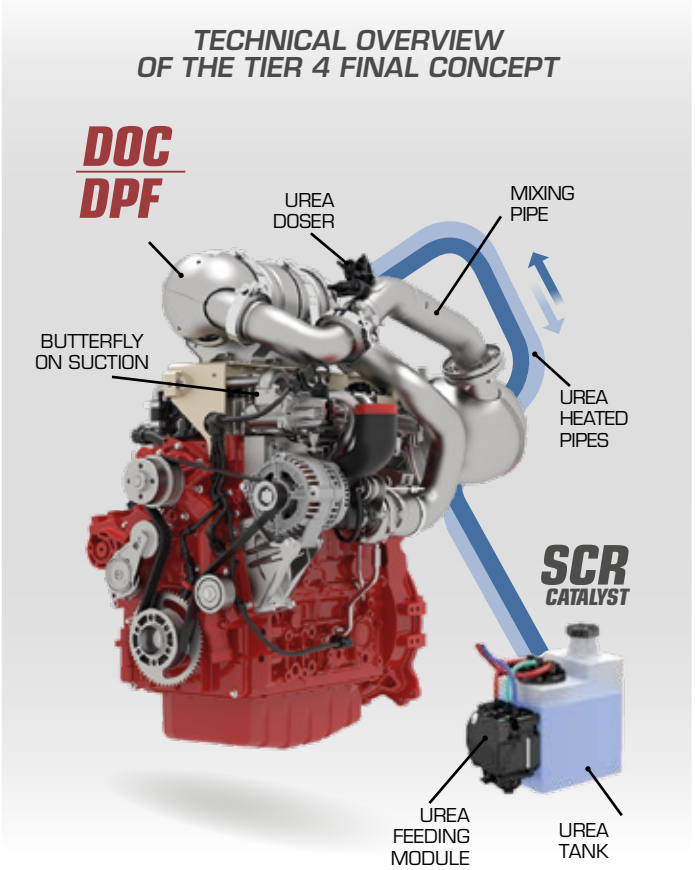
BENEFITS

EXHAUST GAS MANAGEMENT

The exhaust gas management on this engine is DOC/DPF + SCR.
DOC (Diesel Oxidation Catalyst) is a catalyst that reacts by contact with the engine exhaust gases, transforming its main components into substances that are not harmful to the environment.
The DPF (Diesel Particulate Filter) is a DEUTZ diesel particulate filter, coated with noble metals and adapted to the installation needs of the individual customer application, which supports regular, safe and continuous regeneration, without the need for regular maintenance or additional operating fluids. The use of reliable turbocharger technology, especially compared to SCR-based EAT systems only, enables optimum engine performance throughout the entire rev range.
A surface temperature of max. 250°C provides additional safety during operation.
The SCR (Selective Catalytic Reduction) is a method for reducing NOx emissions. The basis of this technology is a 32.5% liquid urea solution, which is sprayed into the exhaust duct by a dedicated vanadium- or zeolite-coated catalyst. Urea produces ammonia (NH3) in a passive transformation which reacts with NOx and oxygen to form nitrogen and water.

ADVANCED TECHNOLOGY FOR EXHAUST GAS RECOVERY

TECHNICAL OVERVIEW OF THE TIER 4 FINAL CONCEPT



ENGINE MANAGEMENT

Engines equipped with DEUTZ Common Rail® injection communicate with the machine via a CAN-Bus protocol. This allows functions such as drive-by-wire and full engine control to be integrated into electronically controlled hydrostatic thrusters.
The automatic electronic control also guarantees the integrated engine diagnosis and safety system. If the controller registers an abnormal motor status, as in the case of overheating, engine performance is reduced to emergency mode until it shuts down. This minimizes costly repairs, reduces equipment downtime and increases operational reliability.

COMMON RAIL

The powerful Common Rail® injection system and the Electronic Engine Control (EMR) with smart connection to engine management ensure optimum engine performance with low fuel consumption.

DEUTZ TCD 3.6 L4 - **100kW** — 9.63D | 10.63D

Z KINEMATICS

DIESEL ENGINE

4 in-line cylinders, supercharged, charge air cooling, electronically controlled, common-rail injection, exhaust gas recirculation, water cooling, dry filtration, oxidation catalyst (DOC) particulate filter (DPF) and selective catalytic reduction (SCR). Issued according to EC Directive 97/68 - Stage V/Tier 4f.

Type		Deutz TCD 3.6 L4
Max. power		94,5 kW - 128 HP
Calibration (RPM)		2.300
ISO/TR 14396 power		90 kW - 122 HP
EEC 80/1269 power		90 kW - 122 HP
Maximum torque	Nm	480
Bore	mm	98
Stroke	mm	120
Displacement	cm^3	3.620

ELECTRIC SYSTEM

Battery	12 Volt
Capacity	110 Ah - 850 A
Alternator	95 A
Reverse gear alarm	Standard
Cabling compliant with regulations	IP 67 - DIN 40050

TRANSMISSION

Hydrostatic with electronic power regulation and closed circuit with variable displacement pump and motor. 3 driving modes: Automotive, Eco and Smart Forward Motion*. 2-speed mechanical gearbox with synchronizer (gear change from standstill).

2 Work Speeds	*Forward*	*Reverse*
1st gear km/h	0÷6	0÷6
2nd gear km/h	0÷13	0÷13

2 Transfer Speeds	*Forward*	*Reverse*
1st gear km/h	0÷18	0÷18
2nd gear km/h	0÷40**	0÷40**

** Optional, on request.* *** Self-limited maximum speed*

AXLES

Heavy Duty axles of the same size with epicyclic final reduction gears on each wheel. Rigid front axle. Oscillating rear axle with 25° travel. Distribution of the movement to the two front and rear axles by means of cardan shafts. Automatic self-locking differential on the front axle (optional on the rear)

BRAKING SYSTEM

Service brake: hydraulic multi-disc oil bath on the front and rear axles.
Parking brake: negative hydraulic, electrically operated, on the front axle.

TIRES

Standard	15.5 x 25

STEERING SYSTEM

Power assisted steering by LOAD SENSING power steering.

Steering angle		80°
Tire inner turning radius	mm	2.703
Tire outer turning radius	mm	4.756
Bucket outer turning radius*	mm	5.270

TRANSMISSION

Hydrostatic with electronic power regulation and closed circuit with variable displacement pump and motor. 3 driving modes: Automotive, Eco and Smart Forward Motion*. 2-speed mechanical gearbox with synchronizer (gear change from standstill).

2 Work Speeds	*Forward*	*Reverse*
1st gear km/h	0 ÷ 6	0 ÷ 6
2nd gear km/h	0 ÷ 13	0 ÷ 13

2 Transfer Speeds	*Forward*	*Reverse*
1st gear km/h	0 ÷ 18	0 ÷ 18
2nd gear km/h	0 ÷ 40**	0 ÷ 40**

** Optional, on request.* *** Self-limited maximum speed*

AXLES

Heavy Duty axles of the same size with epicyclic final reduction gears on each wheel. Rigid front axle. Oscillating rear axle with 25° travel.Distribution of the movement to the two front and rear axles by means of cardan shafts. Automatic self-locking differential on the front axle (optional on rear)

BRAKING SYSTEM

Service brake: hydraulic multi-disc oil bath on the front and rear axles.
Parking brake: negative hydraulic, electrically operated, on the front axle

TIRES

Standard	460/70 R24

STEERING SYSTEM

Power assisted steering by LOAD SENSING power steering.

Steering angle		80°
Tire inner turning radius	mm	2.590
Tire outer turning radius	mm	4.870
Bucket outer turning radius*	mm	5.350

** in transfer position*

HYDRAULIC SYSTEM

Comprising two gear pumps, the first for the loader and steering circuit with LOAD SENSING valve, the second for the fan circuit, having a double rotation speed. Modular 2-section distributor with general valve. Double acting jacks.
Hydraulic oil cooling radiator. Full-flow filter on the return circuit. Single lever servo control for 4-position lifting control and 3-position bucket control.

Max flow rate	lt/1'	105
Flow rate with high-flow kit (optional)	lt/1'	130
Loader calibration pressure	bar	230
Steering calibration pressure	bar	175
Lifting jacks	mm	105x795
Bucket jacks	mm	80x680
Lifting time (full)	sec.	5.4
Lowering time (empty)	sec.	3.9
Unloading time	sec.	1.8
Total cycle time	sec.	11.1

FLUIDS & LUBRICANTS

Engine	lt	8
Front differential	lt	9,2
Rear differential	lt	9,1
Reduction gear/adapter	lt	1,8
Hydraulic circuit	lt	128
Brake circuit	lt	0,9
Fuel	lt	140
Water radiator	lt	20
AdBlue	lt	20

TECHNICAL FEATURES

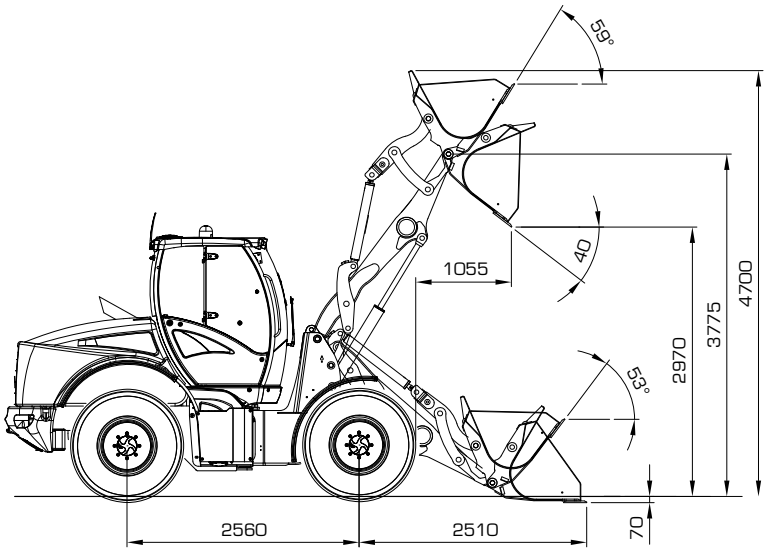
Standard bucket capacity	m^3	1,2
Bucket width	mm	2.250
Static tipping load on a horizontal surface	kg	5.150
Static tipping load turned 40°	kg	4.600
Hydraulic lifting capacity at max. height	kg	10.000
Hinge pin height	mm	3.775
Dump height at 40°	mm	2.970
Dump distance at 40°	mm	1.055
Breakout force	kg	9.400

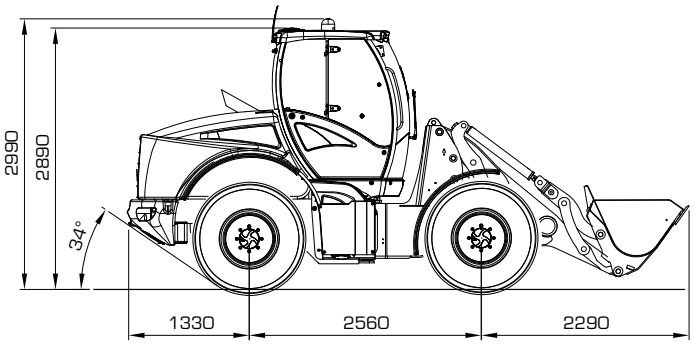
DIMENSIONS & WEIGHTS

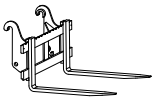
Max length in transferl position	mm	6.180
Max. width in transfer position	mm	2.250
Tire outer width	mm	2.230
Tread width	mm	1.770
Pitch	mm	2.560
Clear span	mm	250
Max height	mm	2.890
Standard operating weight	kg	8.200
Maximum permissible weight	kg	8.750

NOISE LEVEL

Noise level inside cabin ISO 6396 – LpA	dB(A)	69
External noise level ISO 6395 - LwA	dB(A)	101







PERFORMANCE DATA

MOST COMMON OPTIONAL TIRES | OTHER TIRES UPON REQUEST

15,5 x 25
MIITAS EM60

L3 tire suitable for heavy use with excellent self-cleaning properties.

Machine width: 2.104 mm

405/70 MITAS
EM01 o MPT21

Not directional multi-purpose tire.

Machine width: 2.117 mm

440/80 R24
MICHELIN XCML

Agricultural tire long duration with high traction and high load capacity.

Machine width: 2.211 mm

500/70 R24
ALLIANCE A580

Tirewith an exclusive profile which guarantees strong traction, specific for soft surfaces.

Machine width: 2.275 mm

9.63D
Z KINEMATICS

DIESEL ENGINE

4 in-line cylinders, supercharged, charge air cooling, electronically controlled, common-rail injection, exhaust gas recirculation, water cooling, dry filtration, oxidation catalyst (DOC) particulate filter (DPF) and selective catalytic reduction (SCR). Issued according to EC Directive 97/68 - Stage V/Tier 4f.

Type		Deutz TCD 3.6 L4
Max. power		105 kW - 143 HP
Calibration (RPM)		2.300
ISO/TR 14396 power		100 kW - 136 HP
EEC 80/1269 power		100 kW - 136 HP
Maximum torque	Nm	500
Bore	mm	98
Stroke	mm	120
Displacement	cm^3	3.620

ELECTRIC SYSTEM

Battery	12 Volt
Capacity	110 Ah - 850 A
Alternator	95 A
Reverse gear alarm	Standard
Cabling compliant with regulations	IP 67 - DIN 40050

TRANSMISSION

Hydrostatic with electronic power regulation and closed circuit with variable displacement pump and motor.
4 driving modes: Automotive, Work, Eco and Smart Forward Motion*. 2-speed mechanical gearbox with mechanical speed ratio variation (Shift On Fly).

2 Work Speeds	*Forward*	*Reverse*
1st gear km/h	0 ÷ 6	0 ÷ 6
2nd gear km/h	0 ÷16	0 ÷16

2 Transfer Speeds	*Forward*	*Reverse*
1st gear km/h	0 ÷14	0 ÷14
2nd gear km/h	0 ÷40**	0 ÷40**

** Optional, on request.* *** Self-limited maximum speed*

MOST COMMON OPTIONAL TIRES | OTHER TIRES UPON REQUEST

500/70 R24 MICHELIN XCML

Long-life agricultural tire with high traction and high load capacity.

Machine width: 2.351 mm

15,5 R25 MICHELIN XTLA

High traction multi-purpose L2 tire.

Machine width: 2.209 mm

15,5 x 25 CAMSO LOADMASTER L3

Optimized for multi-surface; high resistance to lateral impact and improved stability.

Machine width: 2.127 mm

17,5 R25 AEOLUS A2233 L5

L5 tire with compound resistant to cut and impact. Very low puncture risk. Tread designed for exceptional traction and stability.

Machine width: 2.205 mm

17,5 R25 MICHELIN XMINE D2 L5

Ideal tire for heavy loads, high strength and excellent traction/ adhesion compromise.

Machine width: 2.240 mm

17,5 R25 NOKIAN GRS

All-season tire, ideal for winter conditions. Good driving comfort.

Machine width: 2.198 mm
